

August 10, 2021

Dear Mayor Eisenbeisz and Assembly Members,

Thank you for the hard and often thankless work you do as public servants. Thank you for your care and concern for the citizens of Sitka. Thank you for doing the best that you can during this pandemic. And thank you for listening to my statement in the [assembly meeting on July 29](#).

I said the following at that meeting: [“One size fits all medical mandates are madness especially when made by non-medical government officials.”](#)

In retrospect, I regret making that statement based on the following:

The pharmaceutical industry controls the Centers for Disease Control and Prevention (CDC). Robert F. Kennedy, Jr. said it this way,

“The CDC is a very troubled agency, and it’s not just me saying that. There have been four separate, intensive federal investigations by the United States Congress—a three year investigation, 2001, 2002, 2003, by the United States Senate, Tom Coburn’s committee, by the Inspector General of HHS in 2008, by the Office Integrity in 2014. All of them have painted the CDC as a cesspool of corruption, of an agency that has become an absolute subsidiary of the pharmaceutical industry, and that has become a sock puppet, a spokesperson, a shell for the industry.

“CDC is not an independent agency. It is a vaccine company. CDC owns over twenty vaccine patents. It sells about \$4.6 billion of vaccines every year. And its primary metric for success in all the departments in the agency are vaccine sales. The groups, for example the Immunization Safety Office, where the scientists who are supposed to be looking at efficacy and safety in vaccines, they are no longer a public service...agency. They are subsumed in that metric: We have to sell as many of these things as possible. And so they do things to their science to make sure that nothing interferes—no information—interferes with sales.” (1)

Big Pharma has also invested billions of dollars in the marketing of slogans such as, “Ask your doctor” and “Only your doctor knows.” This marketing campaign has resulted in generations of Americans who believe that doctors somehow have the corner on medical-related truth.

They don’t.

The same industry that tells the public to “Ask your doctor” controls the medical establishment from the first day of medical school, through residency, and practice. (2)

Doctors are trained to follow and obey. They are trained and expected to prescribe pharmaceutical drugs and push vaccines. (3) Those who disobey are removed from the system—the same system that ranks as the third leading cause of death in the USA, the same system that denied doctors access to effective Covid treatments while authorizing a dangerous drug known to kill patients. (4-5) No wonder the suicide rate for doctors is among the highest of all professions. (6)

While I appreciate your efforts to protect Sitkans during this pandemic, by consulting with local medical doctors and public health officials, you were provided with the only tools their regulatory and Pharma controllers allow them to offer: social distancing, lockdown, masks, and vaccines. If they deviate, they'll be sanctioned, if not fired. (7-8) Their approved treatment protocol is also rigidly defined which boosts reimbursements, but also results in needless deaths. (9)

Fortunately, there are doctors and medical groups that still practice ethical medicine. Many of these doctors have been successfully preventing nearly all Covid-related hospitalizations and deaths for well over a year with a variety of over the counter and prescribed medications. (10-15)

You probably don't know about these doctors and medical associations because the same people who control Big Pharma, the medical establishment, and the regulatory agencies also own and control legacy media. (16)

During the recent assembly meeting, two local doctors commented by phone saying that masking the public is the right thing to do and that “everyone knows that masks work.”

They didn't present any studies to support their statements because they don't need to. They are, after all, doctors. It's their job to tell us what to do and it's our job to obey. Right?

Wrong.

The statements they made are factually incorrect.

I quote Dr. Jim Meehan, MD from his book *Why Wearing a Mask Makes Healthy People Sick: An Evidence-Based Analysis of Why Masks Are Ineffective, Unnecessary and Harmful*:

» *Decades of the highest-level scientific evidence (meta-analyses of multiple randomized controlled trials) overwhelmingly conclude that medical masks are ineffective at preventing the transmission of respiratory viruses, including SARS-CoV-2.*

» *Those arguing for masks are relying on low-level evidence (observational retrospective trials and mechanistic theories), none of which are powered to counter the evidence, arguments, and risks of mask mandates.*

» *The majority of the population is at very low to almost no risk of severe or lethal disease from CoVID-19. Children are at an extraordinarily low risk of dying from CoVID-19. Based on CDC published data, 99.99815% of children that contract CoVID-19 survive.*

» *Transmission of SARS-CoV-2 among children in schools and daycares is very rare.*

» *Masks worn properly are well documented to cause harm to their wearers. Masks worn improperly, re-used, or contaminated are dangerous.*

» *Any reasonable risk to benefit analysis of medical masks concludes that the risks overwhelmingly outweigh the benefits.*

» *Children are at imminent risk of harm from mask mandates. (17)*

I attached a PDF copy of Dr. Meehan's book to this email message.

If you read Dr. Meehan's book, you will inevitably conclude that masking the public is indeed ineffective, unnecessary, and harmful. You will come to this conclusion, not because of Dr. Meehan's words, but because you'll learn of dozens of primary source documents spanning more than four decades that repeatedly demonstrate that masks are ineffective, unnecessary, and harmful even in clinical settings.

If you read Dr. Meehan's book, you will inevitably conclude that masking children is both physically harmful and emotionally traumatizing. In short, masking children is child abuse. You will understand that by mandating masks, you are individually and collectively responsible for the abuse of Sitka's children and adolescents.

If you read Dr. Meehan's book, will get a glimpse of a frightening concept: doctors who contradict the mainstream narrative are at risk of losing their jobs. Therefore, they may or may not be able or willing to provide you with accurate information and treatment. This knowledge places a greater responsibility on you to search out and find accurate information, a difficult and socially dangerous thing to do when scared people are pleading with you to protect them.

Once you know the truth, you can confidently tell people that regardless of variant, masks are ineffective, unnecessary, and harmful. You can tell them that if they must be afraid, they should be afraid of the sociopaths who create, manipulate, and profit from their fear. (18)

As Dr. Meehan wrote,

“The evidence is clear—masks are ineffective, unnecessary, and harmful. What’s happening in the world today, including the misinformation surrounding community mask wearing, is about political agendas, symbolism, and fear, not science.” (18)

After you’ve read Dr. Meehan’s book, you will be faced with a decision: adhere to your ethics and values and rescind the mask mandate or yield to the oppressive pandemic zeitgeist by pretending that masks protect against viral illnesses just as doctors and countless others do to keep their jobs.

I don’t know any of you well, but I believe each of you passed the mask mandate ordinance because you sincerely believe it was right thing to do. I applaud you for that. You made the best decision you could based on the information you had at the time.

*After you’ve read Dr. Meehan’s book, you will know without doubt that the information you had at the time was factually incorrect. You will know without doubt that masking the public is scientifically indefensible. You will know that to protect Sitkans and their children, you must protect them *from* the Pharma-controlled medical establishment and public health system. You will know that by instituting a mask mandate, you aligned yourselves with a multi-billion-dollar propaganda campaign, and that by doing so you’re on the wrong side of history and the wrong side of science.*

As good people, that’s not where you want to be.

Because you **are** good people, committed to carrying out your duties with honor and integrity, and because you care more about truth than about your standing in the community, I applaud you in advance for rescinding the mask mandate the next time the assembly meets.

Respectfully,

Brett Wilcox, author
